Safer snacks for teeth

Try to avoid giving sweet snacks. Keep sweet things to mealtimes as part of a balanced diet. **Sweets, cakes, chocolates and biscuits** contain sugar.

Fresh fruit and vegetables are safe snacks when given whole. **Smoothies and fruit juices** are full of sugar.

Other safe snacks could include:

Toast

Cheese

Bread sticks

Crackers

Vegetable sticks

Hummus

Rice cakes (plain)

Savoury spread on toast (e.g. Marmite)

Be aware: **NO ADDED SUGAR**

Doesn't mean sugar-free.

Remember:

Visit your dentist regularly. They will tell you when you should call for your next check-up.

The advice in this leaflet is based on the Department of Health document: Delivering better oral health: an evidence-based toolkit for prevention. 3rd edition June 2014 and Public Health England, Health Matters, Preventing tooth decay, June 2017

**Bromley
Healthcare**
better together

The Special Care Dental service is provided by Bromley Healthcare, an award-winning social enterprise working with the NHS, delivering a wide range of community healthcare services to people of all ages in Bromley and its neighbouring boroughs.

We provide a wide range of nursing, medical and therapy services for adults and children. These include District Nursing, Health Visiting, Speech and Language Therapy, Physiotherapy and Occupational Therapy. 98% of our patients would recommend our services to their friends and family.

Tell us what you think

We want you to be happy with the service you receive from us, but we know that every so often something might go wrong. If you're unhappy with the care you receive or an element of our service, we want to hear from you.

Of course, we also want to hear from you if you're happy with the care you're receiving - it's good to be able to thank the team and let people know they're doing a good job, so if you have a compliment or congratulation, we'd like to hear from you.

If we are unable to resolve your concerns or you would like to take the matter further please contact us at the address below.

Oral health tips for children's teeth

Keep them clean

Everyone should brush their teeth twice a day. Last thing at night (with nothing but water to drink afterwards) and at another time in the morning.

You should supervise your child's tooth-brushing until they are at least 7 years old. Use a soft-bristled toothbrush suitable for their age.

Fluoride toothpaste

For maximum tooth-decay prevention, it is recommended to use a family toothpaste 1350-1500ppm fluoride. (This can be found on the tube's ingredients.)

Children aged 0-3 years are to only use a **tiny** smear (see picture below)

Children 3 years+ can have a **pea-sized** amount (see picture below)

Important:

**Keep toothpaste out of children's reach.
Do not let a child eat toothpaste.
An adult should measure out the toothpaste.**

Tooth-brushing

If you are brushing for a young child, position them facing away from you.

Make it fun!

Brush all surfaces of the top and bottom teeth, this should take two minutes.

Encourage your child to spit out the toothpaste foam and not rinse afterwards.

Food and drink advice

Sugary foods and drinks should be kept to mealtimes only (max 4 times per day.)

Ensure your child has regular check-ups with a dentist.

Drinks

Water and milk are the safest drinks for teeth.

Don't put sweetened drinks into **bottles** (baby or sports bottles) as this is really bad for teeth.

This includes not putting honey, fructose, sugar or milkshake powder/syrup into milk.

Sugar free fizzy drinks and citrus fruit juices are very acidic and can lead to tooth erosion.

Foods

Try to eat a healthy balanced diet.

Look out for **hidden sugars** in foods - check the label.

Find carbohydrates (of which sugars) and then check the amount.

5g is equal to 1 teaspoon of sugar.

Nutrition Information		
Typical Values	Per 100g	Per Serving (250g)
Energy	446kj (105kcal)	892kj (262.5kcal)
Fat	0.9g	22.5g
of which saturates	0.5g	1.5g
Carbohydrate	22.7g	56.75g
of which sugars	4g	10g
Fibre	1.2g	3g
Protein	3.2g	8g
Salt	0.61g	1.525g

Watch out for honey, fresh fruit juices and dried fruit, they are full of sugar. Eat only as part of a meal.
